

MEMORANDUM

TO: Scott A. Radig, P.E., Director
Division of Waste Management

FROM: L. David Glatt, P.E., Chief 
Environmental Health Section

SUBJECT: Petrocomp Special Waste Permit Application Review and Final Decision

DATE: June 2, 2010

I have reviewed the document titled *Review and Response to Public Comments Received for the Proposed Petrocomp Special Waste Facility*, dated April 27, 2010 and the attached draft Permit No. 0357, which incorporated changes suggested in the review document. I concur with the Division of Waste Management's recommendation to approve the permit based on meeting or exceeding the requirements of North Dakota Administrative Code § 33-20-03.1-03, with the following clarifications:

- Condition D.4. – distance from the edge of any drainage or high erosion area should be at least seventy-five (75) feet.
- Condition E.9. – clarify that any requested information must be provided to the Department within thirty (30) days.
- Condition F.9. – clarify that waste acceptance must remain suspended until Department approval is provided in writing following discovery that any waste on site is equal to or exceeds the TENORM standard of 5 cPi/gm above background.
- Condition F.12. – clarify that personnel training must be performed annually.
- Condition F.23. – clarify that erosion control inspections must be documented in writing.
- Condition G.8. – clarify that the maximum starting TPH concentration in treatment rows shall not exceed 50,000 ppm total TPH as DRO and GRO.
- Throughout permit change “formal approval” to “written approval”.

Please make these changes, approve the permit, and provide notification to the applicant and the Bowman County Commission.
